Subject: Sete Allocation

In the end, we obtained an allocation of BRL 514.459.990,00. The “gap” was created by Bradesco deciding to stay at its original BRL 250 MM, Santander then deciding to only double its allocation to BRL 500 MM, thereby leaving BRL 1.25 billion to be split among BTG Pactual (which will go to 30%), Aldo Floris and EIG. Luiz claims all the shareholders, including BTG Pactual, are happy to have a foreign investor like us in the ownership structure.
